The CCI technical indicator can be employed to help figure out if a stock is entering overbought or oversold territory. CCI may also be used to help discover divergences that may signal reversal moves. A CCI closer to +100 may provide an overbought signal, and a CCI near -100 may provide an oversold signal.

Tracking other technical indicators, the 14-day RSI is presently standing at 80.98, the 7-day sits at 92.87, and the 3-day is resting at 99.57. The Relative Strength Index (RSI) is a highly popular technical indicator. The RSI is computed base on the speed and direction of a stock's price movement. The RSI is considered to be an internal strength indicator, not to be confused with relative strength which is compared to other stocks and indices. The RSI value will always move between 0 and 100. One of the most popular time frames using RSI is the 14-day. Using the 14-day RSI, if a stock price rose for 14 straight days, the value would be 100. If the stock fell for 14 straight days, the RSI value would be 0.

Moving averages have the ability to be used as a powerful indicator for technical stock analysis. Following multiple time frames using moving averages can help investors figure out where the stock has been and help determine where it may be possibly going. The simple moving average is a mathematical calculation that takes the average price (mean) for a given amount of time. Currently, the 7-day moving average is sitting at 0.12.

Let's take a further look at the Average Directional Index or ADX. The ADX measures the strength or weakness of a particular trend. Investors and traders may be looking to figure out if a stock is trending before employing a specific trading strategy. The ADX is typically used along with the Plus

Directional Indicator (+DI) and Minus Directional Indicator (-DI) which point to the direction of the trend. The 14-day ADX for Holista Colltech Limited (HCT.AX) is currently at 33.41. In general, and ADX value from 0-25 would represent an absent or weak trend. A value of 25-50 would support a strong trend. A value of 50-75 would signify a very strong trend, and a value of 75-100 would point to an extremely strong trend.

Investors may be watching other technical indicators such as the Williams Percent Range or Williams %R. The Williams %R is a momentum indicator that helps measure oversold and overbought levels. This indicator compares the closing price of a stock in relation to the highs and lows over a certain time period. A common look back period is 14 days. Holista Colltech Limited (HCT.AX)'s Williams %R presently stands at -16.48. The Williams %R oscillates in a range from 0 to -100. A reading between 0 and -20 would indicate an overbought situation. A reading from -80 to -100 would indicate an oversold situation.
